

Rack climbing and the gender gap: visualization proposals

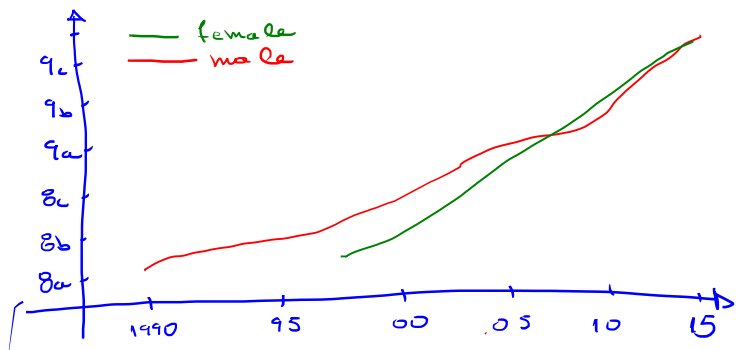

1. climbing, where?

map showing
• crags
• climbers

maybe a second map
showing Greece
only?

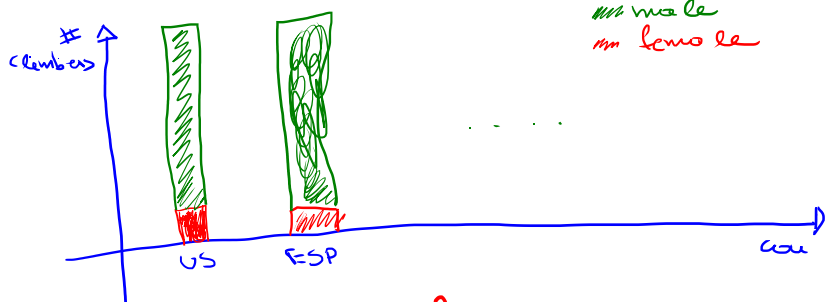

2. Climbing grades:

- link a graph describing the grading system.
- grading difficulty evolution in time.

3) climbers: how many male and female climbers?

maybe a bar chart with two colors per bar (m/f)?

4) small gender gap: why?

- grade vs height
 - grade vs weight
 - grades vs age
- trend showing that smaller and lighter climbers perform better
- add a m/f filter to show that most of the female athletes are also smaller and lighter...

5) history of climbing: scrolltelling? I don't know how easy/hard it is...

6) check out some examples for more ideas...
